Want to improve the quality of your writing? Type slower

Let's face it, not everybody's equally **gifted** when it comes to getting their thoughts down on paper (or the digital equivalent). But according to a **new** study, there's an easy trick anybody can do to improve the quality of their writing: just type more slowly.

??

Researchers in Canada have found that when people are forced to write at a slower speed, it can actually enhance their way with words, with the use of word choice in particular benefiting from a calmer pace.

??

"Typing can be too fluent or too fast, and can actually impair the writing process," said Srdan Medimorec, a cognitive psychologist from the University of Waterloo. "It seems that what we write is a product of the interactions between our thoughts and the tools we use to express them."

"??" "??"

To examine how an enforced speed limit might affect writing ability, the researchers recruited participants and asked them to write essays using both hands or with only one.

??

When the researchers examined the essays with text-analysis software, they discovered that the impeded, one-
