

《河南一农民用废旧材料制作铁马》

A farmer in Anyang, Central China's Henan province has been turning heads with his unique form of transport. Dong Xianchen spent 12 years building his 1.7-meter-long, 1.2-meter-tall, 100-kilogram iron horse with recycled material. From his carriage at the back, Dong can control the speed and direction of the horse by a system of levers and switches. [Photo/VCG]
