

《Yonhap: Artillery fire from DPRK heard near border》

South Korea says an artillery fire from the DPRK was heard Saturday morning...near the western maritime border.

South Korea's Yonhap News Agency quoted the country's military official as saying that the artillery round hasn't landed in the South Korean territorial waters.

No additional fire was heard since then. And residents in the border island... had been evacuated after the artillery fire, but they have resumed normal lives now.
