

《自己种菠萝：学会了这招再也不用买菠萝啦！》

Most people hack off and toss the leafy top of a pineapple. Resourceful people plant these spiky parts to grow yet another pineapple.

??

In fact, certain fruits and vegetables are prime for planting and reproducing.

????????????????????

Some may take more time and care than others: That pineapple, for example, will take more than a year to grow and will need some room outdoors.

??

But green onion, on the other hand, will cultivate in just a matter of days in the comfort of a cup of water.

????????????????????????????????????

The whole process of regrowing produce is pretty neat, and it's gratifying, too.

????????????????
