

《NPC introduces five development concepts》

One of the key issues to be discussed at this year's NPC session is the 13th Five-Year Plan.

A series of crucial ideas have been identified to guide development during the five-year period. The first such a idea is a set of five development concepts: innovation, coordination, green development, opening up, and sharing

The concepts are designed to facilitate building a “moderately prosperous society in all respects” by 2020.
