

《美国副总统彭斯称政府计划放宽航空航天探索限制》

美国副总统、国家太空委员会主席彭斯称，美国政府计划放宽航空航天探索限制，增强美国企业在该领域中的研发自主性。

Vice President Mike Pence has brought a newly revived advisory group to Florida's Kennedy Space Center for a rundown on how best to get Americans back to the moon, a half-century after NASA's Apollo heydays.

??

Pence convened the meeting Wednesday morning inside the building where NASA once prepped pieces of the International Space Station.

??????NASA??

This is the second meeting of the National Space Council. Pence, its chairman, named a group of candidates to advise the council that includes Buzz Aldrin and other former astronauts and aerospace industry leaders.

??Buzz Aldrin????????????????????

Wednesday's meeting focuses on the Trump administration's plan to return astronauts to the moon and get them to

Mars and "worlds beyond."

????????????????????????????????"????"????

Pence toured Kennedy last summer just as the space council was being re-established after two decades.
