

《当英国考试难哭学生 家长是如何做出反应》

Teachers and parents condemned the 'hardest ever' reading test imposed on hundreds of thousands of 10 and 11 year-olds, reporting some pupils were reduced to tears by the exam.

??

Almost 600,000 children sat the reading test this morning on a new tougher national curriculum.

????????????????60????????????????

After the test was complete, teachers took to the Times Educational Supplement forums to protest at how hard the SAT was.

????????????????????????????????????SAT????

The test was intended to be harder than in previous years. Parents expressed their anger on Twitter about the exams after their children came home from school.

??

Parents took to social media to vent their fury describing their children as 'crying, shaking and terrified'. There were even reports of some children being unable to finish their exams due to their tears during the test.

??

Critics claim testing the children in Year 2 is causing mental health problems - while some parents say their children are being 'set up to fail' so the Tories can force through its academies plans.

My poor girl has been unlucky enough to be caught up in this political nightmare. She said the test today was hard and she left a few questions out, but she's hardly crying over it. Even at (just) 11 she's worked out that these SATs are for school and government statistics, and have little or no impact on her future.

??11?????????SAT????????????????????????????????????

billy no mates, Dunno, United Kingdom, 19 hours ago

I expect the problem was the fact it was in English.

Please publish the tests and let everyone see the difficulty which they are supposed to be.
