The announcement comes as scientists in the US and abroad warned that administering the vaccine before Phase 3 trials — which normally last for months and involve thousands of people — could backfire.

Speaking at a government meeting Tuesday, Putin said the vaccine has undergone proper testing and is safe. He emphasized that vaccination will be voluntary.

"I know it has proven efficient and forms a stable immunity, and I would like to repeat that it has passed all the necessary tests," he said. "We must be grateful to those who made that first step very important for our country and the entire world."
