

《BBC记者铁锤猛砸张家界玻璃桥，为中国制造点赞！》

导读:张家界新建了一条长达430米的玻璃悬桥，为了验证这座桥的坚固性，BBC一名记者来到张家界，用铁锤猛击桥面，结果令人震惊。

A journalist has tested the safety of a 430-metre-long glass bridge by slamming it with a sledgehammer.

????430????????????????????

The makers of the world's longest and highest glass-bottomed bridge in Central China's Zhangziazie Grand Canyon invited BBC's Dan Simmons to try to smash his way through the panels - some 300 metres above the ground.

The journalist was seen repeatedly swinging a sledgehammer down into the bridge in an attempt to break through the glass.

????????????????????

Despite smashing the top layer of glass with a number of blows from the sledgehammer, the two reinforced layers of glass below the surface remain intact.

????????????????????

'This is how they're going to assuage people's fears of glass bridges,' Mr Simmons can be heard saying.

??????“????????????????????”

The president of the company behind the bridge vowed it could withstand 25 people jumping on one panel all at once, and support a total of 800 people at a time.

The nail-biting structure, which is between two cliffs in the national park of Zhangjiajie, is set to open to bold tourists in July.

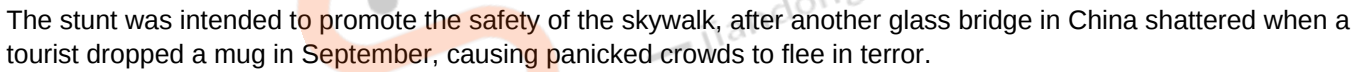

????????????????????????????????

The platform, which cost 26 million Yuan (AUD\$5 million) to build, offers panoramic views of the Hunan province.
