

《乌克兰真人芭比娃娃竟是“黑魔法师”》

导读:乌克兰“真人芭比娃娃”宣称自己是黑魔法师，怪异行动引粉丝愈加崇拜。

She recently claimed that she has barely changed since the age of 14, but pictures of the Ukrainian model Valeria Lukyanova known as a 'Human Barbie' as a teenager tell a different story.

Fans have been left shocked by the pictures shared by Valeria, 30, before she had any plastic surgery, which reveal that she used to be a witch who practiced dark magic.

Ms Lukyanova, who turns 31 in August, admitted that she used to practice dark magic and told fans: 'I remember, you were asking for my picture when I was 15. I was a Goth for a long time.'

One of the pictures shows her wearing a long black dress standing in a circle of fire in a forest, with what looks like blood on her hands, clutching what appears to be an upside down crucifix.

??

Another shows her in a fetching back laced-up top standing in front of a bit of graffiti that says 'Call Me'.

And a third snap, showing 'Odessan Barbie' lying in a bikini on a beach, reveals how she used to look before having breast implants.

The pictures are in stark contrast to how Valeria looks today, with platinum blonde hair, glassy eyes, skinny long legs, a disproportionately large bust and shapely figure.

The Ukrainian model came to attention three years ago after posting images showing her tiny waist online.

??

She insists her doll-like appearance is all real apart from her breasts.

??

And in her recent blog post she tried to address fans' suspicions that she's had additional plastic surgery to create her tiny waist.

??

And other fans said they were scared by the dark magic pics, with Karga adding: 'She is definitely a real witch.'

Despite her appearance and the nickname 'Human Barbie' propelling her into the headlines, Valeria has since decided she finds the references to her as a Barbie 'degrading and insulting.'

???????“?????”??“?????”?

She said she finds it particularly offensive because it suggests that she is deliberately attempting to emulate someone else.

In the past, Valeria claimed she followed a 'breatharian' lifestyle; a cult that believes food - and possibly water - are not necessary for life.

She does not drink or smoke, and claims that she is working towards being a 'breatharian' - a cult that believes food - and possibly water - are not necessary for life.

Her quirky statements about her lifestyle just add to her mystique and have helped earn her more than 350,000 followers on Instagram.
