

《美国警方首次用机器人杀死袭警枪手》

导读:机器人为警方拆除炸弹装置等已很常见，但用来杀死危险嫌疑人还是首例。一起来关注下达拉斯机器人警察在杀死袭警枪手中的表现，以及其所引发的广泛争议。

There's nothing new about a dangerous suspect dying at the hands of police.

????????????????????

But Thursday night in Dallas, the situation played out with a twist. Micah Johnson, believed to have fatally shot five police officers, was killed by an explosive device that a robot delivered.

????????????????Micah Johnson????????????????

Two executives at robotic companies told CNN this is the first time a police robot has been involved in a civilian's death.

????????????????BBC????????????????

"We saw no other option but to use our bomb robot and place a device on its extension for it to detonate where the suspect was," Dallas police chief David Brown said at a news conference Friday morning. "Other options would have exposed our officers to grave danger."

??

Bielat's ground robots, which are designed for law enforcement, aren't designed to be used for lethal purposes. But that doesn't stop them from being used that way.

Bielat??

"If the first responders who were there thought this was the most appropriate way to use it, it must have been the most extreme situation," Bielat said. "It's tragic that this situation ended this way, but it was in respond to an even greater tragedy."

"??"Bielat??"????????????????????????????????"

Bielat said using robots in police encounters can actually improve safety and reduce deaths.

Bielat????????????????????????????????

"You can't shoot second if you're a person and you're dealing with somebody's who is armed," Bielat said. "But if you're a robot you absolutely can."

"????????????????????"Bielat??"????????????????"
