

《你还敢吃吗？费列罗旗下巧克力含有潜在致癌成分》

导读:近日德国食品监察组织Foodwatch在抽查当地市场20多款零食后发现，费列罗旗下产品健达巧克力条等3款食品含有可致癌物芳香烃矿物油，呼吁供货商予以召回。

There are calls for a Kinder chocolate bar to be recalled, following the discovery that it contained traces of a possible cancer-causing oil.

????????????????????

Germany's Foodwatch found the Kinder Reigel contained mineral oil aromatic hydrocarbons (MOAH), which the European Food Safety Agency has said 'may be carcinogenic'.

???????Foodwatch????????????????????MOAH????????????????????"????"?

It has led to calls for the bar, available in some Aldi stores in Germany, to be recalled.

????????????????????

There is no acceptable levels of mineral oils in food for consumption,' Johannes Heeg, a Foodwatch campaigner told The Local.

"????????????????????"Foodwatch????????-?????"???"???????

You can't see it, you can't taste it, but it's in there.

"????????????????????"

We recommend not purchasing these products because the levels are simply unacceptable for consumption.'

"????????????????????"

Foodwatch also found MOAH in two other German products, Lindt's Fioretto Nougat Minis and Sun Rice Classic Schokohappen.

Foodwatch????????????????????????????????Schokohappen???????

However, other groups have said the risk is minimal.

??????????????????

The Association of the German Confectionary Agency (BDSI) said there was no need to recall the products as the amounts of MOAH found could 'be consumed without concern'.
