

《广州三胞胎熊猫幼崽庆祝冬天的到来》

广州三胞胎熊猫幼崽庆祝冬天的到来

对住在中国最热的城市之一广州的熊猫三胞胎幼崽来说，冷天气的到来是值得庆祝的。相对于夏天来说，熊猫更喜欢冬天，所以天气变冷让三胞胎熊猫活泛起来。

Cool weather is worth celebrating for a set of panda triplets living at a zoo in the southern city of Guangzhou, one of the hottest places across China.

Pandas prefer winter over summer, so the cool weather has lifted the spirits of the panda triplets. But even with the extra energy, the cubs are quick to fall asleep again.

The animals live together for now, but since pandas are a solitary animal, the zoo has to separate them as they grow older. Otherwise, they'll fight each other, and that's something nobody wants to see.

Cool weather is worth celebrating for a set of panda triplets living at a zoo in the southern city of Guangzhou, one
