

《“变尿为酒”，你敢喝吗？》

导读:比利时根特大学的科学家们称他们制造出一种利用太阳能的机器，可以将尿水再循环，之后酿成酒水。

Mankind has been turning beer into urine for centuries.

????????????????

Leave it to science to find a way to reverse that process.

????????????????

Scientists at Belgium's University of Ghent say they've created a machine that turns urine into potable water, and fertilizer, using solar energy. The scientists have since crafted small batches of Belgian ale from the recycled water.

??

"We call it from sewer to brewer," Sebastiaan Derese, one of the researchers from the University of Ghent, told Reuters. "We're able to recover fertiliser and drinking water from urine using just a simple process and solar energy."
