

《史上首位男性母亲，男人怀孕不再是幻想。。。》

导读:怀孕产子似乎是大自然赋予女性的天职。但是，随着医疗的进步，男性受孕似乎已成为了可能。一起来了解下！

The first ever pregnant man is now a dad-of-three... and transgender men are following suit by preparing to give birth on the NHS.

????????????????????... ..????????????????NHS????????????

Dozens of patients are deciding to get their eggs frozen at specialised clinics, in case they decide to have children when they become men. Although it's possible for a man, who used to be a woman, to become pregnant naturally, this is a rare phenomenon.

??

This method usually requires the fertilised embryo being moved to a surrogate, instead of the transgender man giving birth themselves.

????????????????????????????????

In 2008, Thomas Beatie became the world's first pregnant man, proving that transgender people with female reproductive organs can still give birth.

?2008????????·????????????????????????????????????

The dad-of-three has paved the way for more women who have had sex changes to consider having children.

????????????????????????????

Now, the IVF treatment that the NHS are offering up could increase the likelihood of pregnancy for transgender men.

????????NHS????????????????????

One of the men hoping to be granted the fertility treatment is 17-year-old Riley Middlemore, who was born Rebecca.

The teen hopes that his eggs could be inseminated by a sperm donor and implanted into his girlfriend's body, allowing her to carry their child.

????????????????????????????????????

Last night, his mum Carrie revealed: "He's very passionate about having his own children, but he wants his girlfriend to have the children – he doesn't want to give birth."
