

《日本无人驾驶巴士投入运营》

导读:无人驾驶技术应用更进一步。“ Robot Shuttle ” 无人驾驶巴士今日起在日本正式投入运营，时速可达40km。

Japan's major mobile game provider DeNA has put on display the country's first driverless robot bus which is to become operational next month.

????????DeNA????????????????????

The Robot Shuffle is to begin full service by transferring people in the Aeon Shopping Mall in Chiba's Makuhari district.

EasyMile's testing chief Francois Charlot said actual passenger service requires that “we drive safe without any

accidents.”

EasyMile?????????.????????????????????????????

DeNA’s Robot Shuttle group leader Takashi Tsujiguchi assured that the project is surefire as the vehicle meets all safety measures.

DeNA?“Robot Shuttle”????????????????????????????????

We have lasers at each corner which are really detecting obstacles. We have new sensors coming as well to make it even safer, so it is safe, he said.

??

The Robot Shuttle can seat up to 12 people, and travel at a speed of up to 40 kph. Greece and Switzerland are among other countries testing with driverless buses.
