

《惊!奥运跳水池水一夜蓝变绿 原因暂不明》

导读:星期二,女子双人十米台比赛的跳水池里,池水变成了深绿色。然而就在前一天比赛中,池水还是蓝色的。

(CNN)During the opening ceremony, the Rio Olympics organizers talked about a green environment.

(CNN)????????????????????????????????

They were not talking about the pools at the Maria Lenk Aquatics Centre.

????????????????????????????????

But on Tuesday the water in the pool where the divers for the women's synchronized 10-meter platform competed -- officially called a diving well -- was dark green.

????????????????????????????????

The water had been blue Monday and there was no explanation as to why it had turned color.

????????????????????????????????

But it was safe, organizers said.

????????????????

"The water quality at the Maria Lenk Aquatics Centre was tested and there were no risks for the athletes. We are investigating the cause," officials said.

?????"??"

The adjacent pool at the aquatics center, where water polo is being contested, looked normal.

??

David Boudia, a U.S. men's diver who won silver on Monday night, tweeted a quip wondering whether St. Patrick's Day was being celebrated.

??

Wait is someone playing a joke or are we celebrating St Patty's Day early here in Rio? #divingpond

????"??"

The water in the well must not have bothered China's Chen Ruolin and Liu Huixia, who easily won gold.

??

Cheong Jun Hoong and Pamg Pandelega Rinong of Malaysia took silver, while Meaghan Benfeito and Roseline Filion of Canada grabbed bronze.
