

《A couple of bird lovers》

As they do every morning, Kuang Zhongfan and Wu Zhongrong stroll along the bank of Qianling Lake, in Guizhou, and survey the birds they see **along the way**. The young couple share a love for the avian creatures and have master's degrees in ornithology. They now work at Qianling Park Zoo. Over the past ten years, they have been courting the birds on Qianling Mountain, watching and recording their activities. While some couples may find that they have less in common as time goes by, Kuang and Wu can't have more. Birds tie them together tightly.
