The picturesque city is often associated with West Lake, the well-known attractions with different charm in four seasons. But the natural beauty in the city is more than West Lake.

??

The Qiantang River located in the east of Hangzhou is famous for its magnificent tides, while the Xixi wetland situated in the western part of the city is notable for its rich ecological resources. Seventy percent of the wetland is consisted of ports, ponds and bogs.

In addition to the natural scenery, the food in Hangzhou is also fantastic. An example can prove the charm of those food. Several US tourists traveling in the city lived less than 1 kilometer from the West Lake, but they didn't visit it immediately because they were indulged in the fabulous local food.
