导读:调查显示，会说一种以上的语言似乎使人更具吸引力，学起来！

Want greater success in your career and your love life, as well as a healthy brain long into old age?

????????????????????????????????

The answer could be to learn another language.

????????????????

Or at least that's the case according to a majority of Americans and Britons polled in a new survey by language app Babbel.

?????Babbel????????????????????????????????

Apparently, 71% of Americans and 61% of Britons believe speaking more than one language makes a person seem more attractive.

???71%????61%????????????????????

Oui, c'est vrai!

??????????

Of 3,000 English-speakers polled in the US and the UK, nine out of 10 admitted they'd learn a new language in pursuit of love.

?3000????????????????????

about half said they'd dreamed about a romance with someone from another country.

????????????????????

And moving from the bedroom to boardroom, about one in four Americans and Britons think that being monolingual has held them back professionally.

????????????????????

So it's probably no surprise that one in eight confessed to having exaggerated their language skills on a resume.

????????????????????

"Languages not only enable you to expand yourself in terms of perspective and skillset, but they also open doors and help you better understand other cultures and peoples," Miriam Plieninger, director of didactics at Babbel, tells CNN.

Babbel????????? ??????????????????"??"

"Knowing another language helps to break barriers and to connect on a special level of mutual understanding; be it while on the street, traveling, or in business."

"??"

Globally, more than half the world can speak at least two languages -- but Western English-speakers are lagging behind.

????????????????????——????????????????

Romantic language is most romantic

???????

And which languages have the most sex appeal -- in UK and US eyes, at least?

????????????????????

Well, the Babbel guys asked that in a previous survey.

Babbel????????????????

French was considered the "sexiest" language by respondents on both sides of the Atlantic (US 40%, UK 32%) and the hottest foreign accent in which to hear English (US 38%, UK 40%).

So being multilingual can make you more appealing, more successful and more compassionate. And it's also good for your health.

??

In 2011, Canadian neuroscientist Ellen Bialystok found that speaking more than one language regularly from an early age enhances cognitive abilities and can also delay symptoms of Alzheimer's disease.

2011????????????????????????????????????

It's "a great way to train your brain," says Plieninger.
