

《采矿污染严重 俄罗斯惊现“血河”》

导读:在俄罗斯社交网络上,达尔迪堪触目惊心的图片被广泛转发。官方媒体《俄罗斯报》称,河水变色有可能是一条输送废弃铜镍浓缩物的管道发生渗漏引起。

Russian environmental inspectors are trying to establish why a river near the Norilsk Nickel industrial complex in the Arctic has turned blood-red.

??

Dramatic pictures of the discoloured Daldykan river have been posted widely on Russian media.

????????????????????????????????

The government daily Rossiiskaya Gazeta says a leaking slurry pipeline carrying waste copper-nickel concentrate could be to blame.

????????????????????????????????????

Norilsk Nickel is the world's largest nickel and palladium producer.

????????????????????

Its vast furnaces were built on the Taimyr Peninsula, in the Krasnoyarsk region of Siberia, in the Soviet era.

????????????????????

The mining group has a production facility called Nadezhda by the Daldykan river. But company officials said they were not aware of any river pollution from the plant.

????????Nadezhda????????????????????

Billionaire oligarch Vladimir Potanin is president of Norilsk Nickel.
