

《窥探：5个迹象告诉你 某人对你“有意思”》

导读:想知道对方到底是否喜欢你？来看看这里，他会给你答案！

He might pay you extra attention in the pub and laugh at your jokes but how do you know if he's really interested in you?

??

1. Closing the gap

1.????

We all have our own personal body space that we protect at all times. If someone is interested in you then they'll do their best to get closer to you.

??

This can be by placing a hand on your arm or by moving their chair a bit nearer. If you are responsive to their touch then things could escalate quickly.

??

2. Rapid blinking

2.????

If you notice they are blinking much more than usual, that's a great indication they like you. That's because prolonged eye contact, combined with excitement, forces their eyes to dry out much faster.

??

3. Talking too much and teasing you

3.????????

Men who are interested in a woman will try and talk as much about themselves as possible. That's because men are conditioned to boast and attempt to impress, so they'll do their best to show off in the hope you'll be attracted to them.

??

4. Noticing little changes

4.??????

If they comment when you change your hairstyle or wear something different, then they could well like you.

??

5. Playing hard to get

5.????

Unfortunately, some people who like you will try to make you think the exact opposite. They won't text you back for ages and won't make you feel special.

??
