In an update posted at 5:37 p.m. EDT (9:37 p.m. GMT), Dyn said its engineers "continue to investigate and mitigate several attacks aimed against the Dyn Managed DNS infrastructure."

????????5:37????????9:37????????????????????????????????DNS?????

Amazon Web Services, a unit of Amazon.com that hosts many of the web's popular destinations, including Netflix, reported an attack that also affected people on the US East Coast around the same time in the morning.

??

"Between 4:31 a.m. (11:31 a.m. GMT) and 6:10 a.m. PDT (1:10 p.m. GMT), we experienced errors resolving the DNS hostnames used to access some AWS services in the US-EAST-1 Region," the company stated on its website.

?????????"4:31????????11:31????????6:10????????1:10????????DNS????????DNS????????1?
?????????"

But this issue has been resolved and the service is now operating normally, it noted.

????????????????????????????????

Digital payments company PayPal admitted experiencing brief interruptions in service due to the attack.

??????PayPal????????????????

"We're sorry for the inconvenience," PayPal tweeted.

"?????????????????"???????

Currently, it's unknown who was behind the attacks.

????????????????????

White House spokesman Josh Earnest said the US Department of Homeland Security is monitoring this situation and will take a close look at it.

???????.????????????????????????????????????

"But at this point, I don't have any information to share about who may be responsible for that malicious activity,"

Earnest told reporters.

“????????????????????”????????

A senior US intelligence official told NBC News that the incidents were "a classic case of Internet vandalism."

????????????NBC????????????

The official was quoted as saying that it does not appear at this point that the attacks were state-sponsored or directed.
