

《 “ 智能学校 ” 来袭 ， 未来的孩子们将会接受怎样的教育 ？ 》

导读:科学技术是第一生产力，它带来的影响涉及到人类社会的方方面面。近日，首批“智能学校”在德国成立，这将成为教育革命发展的重要动力。

First two "smart schools" have been launched in southwestern German state of Saarland, where the annual national IT Summit is underway, local media reported Wednesday.

????????????????????"?????"??

The concept of "smart schools" involves different teaching plans with digital learning material and retraining of teachers, more than just being "an initiative to equip schools with computers, laptops or tablets," said Achim Berg, vice president of German Digital Association.

In light of the pact put forward by German Ministry of Education and Research, the ministry will invest about five billion euros (5.35 billion dollars) into around 40,000 schools in Germany for digital equipment within the next five years. Meanwhile, federal states will be responsible for related new teaching plans and teachers' retraining.

This year's IT Summit focuses on digital education under the theme of "Learning and Acting in the Digital World".

The summit will last till Nov. 17.
