

《54年了，东京首遇11月“初雪”》

导读:因受到强冷空气的影响，当地时间本月24日，日本东京下起了今冬的第一场雪。日本气象厅发布消息称，东京在11月下雪还是1962年以来、相隔54年的事，比去年的初雪整整早了49天。

Tokyo is experiencing its first November snowfall in 54 years.

????54??????11????

Residents of the Japanese capital were taken by surprise, as the temperatures around this time of the year usually range from 10C to 17C.

????????——????????????????10?17????

The snow, caused by an unusual cold front over the city, caused slight delays on public transport.

????????????????????

The first snowfall - which is called "hatsuyuki" - arrived 40 days earlier than average, Japan's Kyodo news agency reports.

????????????????——????“??”????????????????40???

Tokyo last saw November snow in 1962, though in that year it did not accumulate on the ground.

???11?????1962????????????????

The current snowfall marks the first time fallen snow has been seen on the ground in Tokyo in November since records started to be taken in 1875.

????????????????1875????????????

The Japan Meteorological Agency (JMA) has warned of possible icy roads, snow on electric wires and trees, and the collapse of plastic greenhouses, according to the Japan Times.
