

《奇葩考试作弊手段大全》

导读:圣诞将至，如果不想圣诞假期还要复习功课还想考试及格，学生们只好“八仙过海，各显神通”了。一起来看考场那些奇葩的作弊手段。危险动作，请勿模仿！

Students may be breaking up for school this week but that doesn't mean that their Christmas break will be study-free.

????????????????????????????????

With January exams on the horizon, it seems there's no end to the lengths students will go to achieve grades without actually spending their Christmas break revising.

1????????????????????????????????

From equations disguised as nail art to hints hidden under plasters, these cheating hacks shared by milkha prove students don't miss a trick when it comes to cheating.

????????????????milkha????????????????

While they may seem like an easy way out, these methods are not recommended as they constitute as an

immediate disqualification.

??

Students have been sharing their hacks for sneaking answers into an exam room, including writing answers on the thigh and even on their nails

??

No one would suspect a plaster but it is the perfect place to keep some hints during an exam

????????????????????????????

Labels are another classic way of disguising exam cheats with this student able to hide a myriad of facts on her pen's sticker

????????????????????????????????????

This clever hack allows the student to conceal a mobile phone inside a calculator so that answers can be looked up online

????????????????????????????????????

By creating a fake arm with the sleeve of a jacket users are able to check their phones from under their desk

????????????????????

By cutting open the back of a juice carton, clueless students will be able to store their answers within the packaging

????????????????????

Water bottle labels are a more traditional way of hiding exam answers - but students should be wary to write their hints on the inside of the label

????????????????????

One determined student goes as far as to alter a pre-existing drinks label in order to take his notes in with him

????????????????????????????????

One rebellious student determined to score highly wrote the answers to exam questions on the back of a calculator in pencil

????????????????????????????????

Answers written on erasers can be easily flipped over if an invigilator happens to walk past

????????????????????
