

《行走的炸弹Note7惊现机舱，引发一场混乱。然而真相竟然是……》

导读:自从三星Note7发生了一系列爆炸事故，很多航班就明令禁止乘客携带这款手机登机，然而下面要说的这件事，真是让人欲哭无泪...

A flier's decision to name his wifi hotspot "Samsung Galaxy Note7_1097" caused trouble in the skies Tuesday night.

????????????????WIFI?????"??Galaxy Note7_1097"????????????????????

In case you've been dozing during recent pre-takeoff announcements, airlines worldwide have banned the Samsung GN7 after reports the phone's lithium-ion battery can catch fire.

?????????Galaxy Note7??

The BBC reports the mid-air trouble began when a passenger on Virgin America 358 opened up his laptop and spotted the wifi network.

?BBC?????"????"????????????????358????????????????????????????????????Galaxy Note7_1097"?WIFI???

In a series of tweets, Lucas recounted what happened on the late-night flight from San Francisco to Boston.

??

First came a crew announcement: "This isn't a joke. We're going to turn on the lights (it's 11pm) and search everyone's bag until we find it." Then 15 minutes later: "This is the captain speaking." Lucas tweets that if no one owns up, the plane will have to land.

Then finally, relief: "Ladies and gentlemen, we found the device. Luckily only the name of the device was changed to 'Galaxy Note 7'. It was not a GN7." In a statement provided to TechnoBuffalo, Virgin America explains that "when our crew see potential evidence of [the GN7] onboard, they take it seriously."
