

《百度与小鱼在家联合推出人工智能数字助理 亮相2017CES》

导读:在2017年国际消费电子展(CES)上,百度推出了一款人工智能数字助理——“小鱼在家”视频对讲机器人。

Chinese search giant Baidu has unveiled an AI digital assistant.

????????????????????

Xiaoyu Zaijia - or Little Fish - responds to voice commands using a combination of pictures, text and speech. Unlike many rival AIs it is dependant on a touchscreen.

????????????????????

It can answer questions, find local services, play music, make video calls and control smart home devices.

????????????????????

Baidu Chief Scientist Andrew Ng said that artificial intelligence is "the new electricity".

???????Andrew Ng?????????"?????"?

"AI has been growing steadily " he told the BBC at the CES tech show in Las Vegas.

"Those of us on the inside feel the acceleration now but we have been feeling it for the last decade.

“????????????????????10?????????????”

"Just as 100 years ago the electrification of our society transformed industry after industry, I think AI tech has now reached that stage."

“??100???”

Little Fish's hardware has been developed by Chinese robotics firm Ainemo Inc but uses Baidu's AI operating system DuerOS.

Existing digital assistants such as the Amazon's Alexa and Google Assistant are not screen-dependant but can be used by voice alone. Apple's Siri, however, continues to rely on a display to provide some of its information.

Little Fish will launch initially in China in March 2017 and currently only recognises Chinese languages. Baidu has not yet set a price.
