

《中国发现5例H7N9禽流感病例》

导读:中国山东省、江西省、湖南省再次爆发禽流感疫情。

Five human H7N9 avian flu cases were reported in East China's Shandong and Jiangxi provinces as well as the central province of Hunan on Saturday, local authorities said.

The male patient from Shandong's Laiwu City, 53, is receiving treatment in the provincial capital of Jinan.

????53????????????????

Local health sectors have conducted investigations, risk evaluations and disinfected possible areas of transmission to prevent the virus from spreading. Three patients, two females and a male aged at 72, 83 and 48, have been hospitalized in Jiangxi. The local health authorities said the two female patients were in serious condition.
