

《比个“剪刀手”也能泄露指纹信息？下次拍照要换个姿势了》

导读:你知道吗？照相的时候比“剪刀手”可能会让你的指纹被盗取！所以，下次拍照的时候，你可以考虑换个姿势了。

Posing for a picture and flashing the V sign may expose your fingerprints, giving criminals an opportunity to steal your important information, Beijing News cited experts as saying.

??

Researchers with the National Institute of Informatics in Japan successfully retrieved fingerprint information from a picture during an experiment, even though the subject was photographed from three meters away, according to the newspaper.

??

Photos that include both people's faces and fingers run a higher risk of revealing personal information, and the risk for celebrities is even higher, it was added.
