

《聚焦小米6：揭开新款性能面纱》

导读:小米公司宣布将不会参加世界手机大会，继续为小米6的发布蒙上神秘的面纱。关于小米6性能参数的传闻则是热度不减，愈炒愈热。

Rumors of a successor to Xiaomi's 2016 Mi 5 flagship smartphone have begun to heat up, but the company has cooled off any hype by announcing that it will skip Mobile World Congress this year. The Mi 6 was expected to launch at the show, just like the Chinese company's Mi 5 did at MWC 2016.

Still, there's no doubt a successor is on the way — just not as soon as many had hoped. Here's everything we know so far about the Mi 6.

New leaks from MyDrivers suggest the Mi 6 could have a ceramic back — one of the prime features of the nearly bezel-less Mi Mix smartphone.

????????????6????????????????????????????????????Mix????????

Previous leaks offer us a glimpse as to what the phone could look like. If the leaked pictures are actually of the Mi 6, the front of it will resemble Samsung's Galaxy S7 Edge with a curved display and a similarly styled home button. The back is fairly different from the Mi 5, and is more reminiscent of the iPhone 6S.

There are reports that there will be three models of the Mi 6 — one with curved edges and one without, as well as a second flat variant with a different processor.

Release date

????

As mentioned, Xiaomi is skipping Mobile World Congress, which means the Mi 6 won't be revealed until a later date. Xiaomi Today says the company has postponed the phone's launch until April, though the information seems to mostly be based on speculation about the availability of the Snapdragon 835.
