

Captured here in vivid detail by Budapest-based photographer Tamas Toth, the 16 lakes and waterfalls lie in the National Park of the Kapela Mountains

???????Tamas Toth?????????????????????Kapela?????????16?????????

They were formed over millions of years by what is known as the Karst process, the dissolution of soluble rocks including limestone, dolomite and gypsum

????????????????????????????????????????????????????????????

It's almost like stepping straight into Narnia. Tamas hiked through nearly 20 inches of snow to acquire the beautiful shots, in good time before summer once again melts the icy waterfalls back into motion.

????????????????Tamas??????20????????????????????????????????????????????????????????????

It is the Karst process that gives the water its electric blue colour - appearing all the more dramatic when frozen into chunky tendrils

????????????????????????????????????????

The idyllic Plitvice Lakes are one of Croatia's most famous attractions and can lay claim to some of the most beautiful waterfalls in the world

????????????????????????????????????????

The lakes were declared a national park in Croatia in 1949, and were given world heritage status in 1979
