

《你相信吗？Wi-Fi或将退出历史舞台》

导读:曾几何时，我们出门第一件事一定是找WiFi，饭可以不吃，WiFi不能断，活可以不干，WiFi必须连！可是你知道吗，WiFi可能马上就要退出历史舞台了。

According to Bloomberg? consumers won't need to log on to a Wi-Fi network to avoid costly mobile data overage charges when carriers start rolling out unlimited data plans. And that's a critical change that threatens to render Wi-Fi obsolete.

??Wi-Fi????????????????????????????Wi-Fi??????

Tim Farrar, founder of Telecom Media Finance Associates said "You could see a big switch. Your coffee shops may be less compelled to provide Wi-Fi for you now."

In an all-data-you-can-eat world, consumers' use of Wi-Fi at public places like stadiums and airports will drop to a third of all mobile data traffic from about half, Farrar estimates. This means businesses not upgrading public access Wi-Fi as often. Smartphone users might not even turn on their Wi-Fi capability, according to Barry Gilbert, an analyst at researcher Strategy Analytics.

The erosion of Wi-Fi's influence is likely to be slow and uneven. While unlimited data plans make the technology less necessary for phones, many home devices, from a MacBook to an Amazon Echo, still use Wi-Fi to connect to the internet. Wi-Fi also helps fill in gaps in some office buildings and homes that have spotty cellphone coverage.

"Wi-Fi has consistently stayed ahead in terms of performance and its ability to move large amounts of data," said Kevin Robinson, vice president of marketing for the Wi-Fi Alliance, a consortium of more than 700 companies, including Apple , Samsung , LG Electronics, Intel and Qualcomm. "The market is going to decide which technology provides the best capabilities for the end user. To displace a technology like Wi-Fi is likely very optimistic."
