

《研究发现初次约会前看部小黄片就可以把对方“手到擒来”！》

导读:据一项最新研究显示,在约会前来一点“情色消费”可以让人们变得更加开放和
外向,从而可能会让约会更加顺利。

Watching porn before a first date makes it more likely to go well, a study has found.

????????????????????????????

'Sexual priming' before a date can make men and women more open and outgoing.

????“???”????????????????

The study of 246 heterosexual undergraduates by psychologist Professor Birnbaum found that merely thinking about sex makes people more likely to disclose personal information.

????????246????????????????????????????????????

It found this to be true for online interactions such as via Whatsapp and face-to-face meetings.

????????????Whatsapp????????????????????

Students who were shown a naked picture of a member of the opposite sex for just 0.03 seconds were more willing to go on a blind date than those shown a picture of a fish.

Explaining her results, Prof Birnbaum told The Times: 'People reciprocate to these advances [brought on by erotica], and that initiates a positive cycle of intimacy.'

"People reciprocate to these advances [brought on by erotica], and that initiates a positive cycle of intimacy."

'Disclosing personal information makes the other person like you more, thereby motivating him or her to reciprocate.'

"Disclosing personal information makes the other person like you more, thereby motivating him or her to reciprocate."

'Consequently you get the impression that this person likes you, and you react by liking him or her more — we tend to like people who like us — and behave accordingly, for example by being nicer, flirting or complimenting.'

"Consequently you get the impression that this person likes you, and you react by liking him or her more — we tend to like people who like us — and behave accordingly, for example by being nicer, flirting or complimenting."

'Overall, sex starts a positive cycle of getting closer to a stranger that may eventually build emotional connection between previously unacquainted people.'
