

《巨大冰山漂至加拿大小镇 民众争相看山》

导读:有没有想过,早上起来推开窗,看到自家门前飘着一座巨型冰山,会是一种什么样的感受?不少住在加拿大纽芬兰省的居民就自豪地表示,他们刚刚经历了这一场面。

Nature photographers have flocked to a small town in Eastern Canada after a huge iceberg drifted just off the coast.

????????????????????????????????

The towering iceberg floated into waters just next to Ferryland, Newfoundland, causing bumper-to-bumper traffic as tourists try to get a glimpse of it.

????????????????????????????????

The area is known as “iceberg alley” due to the arctic blocks that float down every spring.

????????????????????????????“??”?

This particularly huge one is expected to linger off the coast for some time because it looks grounded, Ferryland

Mayor Adrian Kavanagh told CTV.

??

"It's a huge iceberg and it's in so close that people can get a good photograph of it," he said. "It's the biggest one I ever seen around here."

??? "??"

Canadian press reported that there had already been more icebergs than normal – with 616 already having moved into the North Atlantic shipping lanes compared to 687 by the late-September season's end last year.

??616????????????????????????????????????687????

Experts said it could be because of uncommonly strong winds and possibly global warming.
