

## 《德国Lilium Jet纯电动飞机试飞成功，科幻即将成为现实！》

导读:4月25日，德国Lilium Jet纯电动飞机试飞成功，因此，未来这样的交通工具可能真的会在我们的头上飞舞！那以后在空中应该不会堵车了吧！

The sci-fi dream of climbing into a flying pod and commuting high above the gridlock has moved a step closer following the successful maiden flight of what could be the vehicle of the future.

????????????????????????????????????????????????????????????

The prototype two-seater Lilium Jet, a compact and lightweight electric plane capable of vertical take off and landing, completed an unmanned test earlier this month.

That's given its German creators the green light to forge ahead with plans for a five-seat production model designed for air taxi and ride-sharing services -- or what sounds like an uber Uber.

????????????????????????????????????????????????????????????Uber Uber?

"Seeing the Lilium Jet take to the sky and performing sophisticated maneuvers with apparent ease is testament to the skill and perseverance of our amazing team," co-founder and chief exec Daniel Wiegand says in a release.

"In the longer term, our target is to build an aircraft that not only the super-rich can afford, and that can make private air transportation possible for a much wider number of people," says Weigand.
