

《汇丰调查:移居中国内地的外籍孩子多个层面表现优于全球平均水平》

导读:据汇丰23日发布的“全球移居人士调查”，发现受访的多数在华外籍父母认同移居中国内地有助孩子感受不同的生活体验，其子女的多个层面表现优于全球平均水平。

Foreign children living in Chinese mainland demonstrate better performance than the world average in multiple areas including openness to new experiences, multilingual communication and social group expansion, according to an international expat survey issued on May 23 by HSBC.

?????(HSBC)5?23?????“?????”??

The survey, conducted over nine years, is the world's largest sustained investigation of its kind, inviting interviewees to share their experiences living overseas. It covered more than 26,000 expatriates from countries and regions including Chinese mainland, Hong Kong, Taiwan, France, the U.K., the U.S., Australia, India and Indonesia.

??26000??

The survey showed that about 80 percent of foreign parents in China believe their children have become more open-minded since coming to Chinese mainland, 10 percent higher than the world average.
