

《全球最快乐的机场排名前8》

世界上最幸福的机场是英格兰西南部的一个很小的航站楼，每年接待的乘客都不足一百万。

(CNN) — HappyOrNot, founded in Finland in 2009 by Heikki V?n?nen and Ville Levaniemi, has exclusively shared its first airport report with CNN Travel.

?CNN?——HappyOrNot ??????2009?????????????CNN?????????????????

It reveals the airports with the highest customer satisfaction globally, measured by the percentage of people hitting the dark green or light green buttons.

?????8??

It also tells us the happiest and unhappiest times of day, week and year to fly -- as well as the parts of the airport journey most likely to make us hit the red button of rage.

??

The report is based on feedback from 158 million data-points from HappyOrNot smiley terminals in 160 airports across 36 countries.

HappyOrNot analyzed data collected between November 2016 and November 2017, from airports which received more than 120,000 button-presses in the past year across more than two areas of the airport -- security, baggage reclaim, washrooms and so on.

And it turns out that the happiest airport in the world is a teeny terminal in southwest England, handling fewer than a million passengers a year.

1. Exeter Airport, UK -- 88.66%
