

《苹果更新了“隐私”设置页面，你会放心使用吗？》

马上迎来的苹果系统更新，苹果用户在使用Apple提供的相关的应用程序时会看到新的屏幕隐私提示页面。

Apple has updated its iOS, MacOS and tvOS operating systems to give people more information about how their personal data is collected and used.

??????iOS?MacOS?tvOS????????????????????????????????

After updating, customers will see new information screens when they use Apple-made apps that collect personal data, such as App Store. The change comes ahead of new EU data protection rules, which take effect on 25 May.

????????????????Apple????????????????App Store????????????????????????????5?25????????????????

Apple also plans to let people download the data it has stored about them.

????????????????????

The EU's General Data Protection Regulation (GDPR) toughens the requirements on how organisations handle the public's data, and imposes harsher penalties for breaches.

“”GDPR

Apple has previously promoted its services and smartphones as being privacy-focused.

The latest software update does not change how much data is collected, but new privacy information screens will appear when people use certain Apple-made apps for the first time.

Apple

Tapping the notice will display detailed information about what data is being collected and how it is used.

However, customers will not be able to switch off some types of data collection. For example, they will not be able to download free apps from the App Store without first setting up an Apple ID account.

Apple ID App Store

Apple also plans to release new tools in May that will let customers:

5

I. download a copy of all the data Apple stores about them, including photos, videos and iCloud back-ups

1. Apple iCloud

2. temporarily deactivate their Apple ID, which will stop Apple processing the data

2. Apple ID Apple

3. permanently delete their Apple ID, which will erase all the data Apple stores within 30 days.

3. Apple ID Apple 30

The privacy-focused Open Rights Group welcomed the changes.
