

《社交软件上哪些信息必须赶紧删掉？》

现代人的生活已经离不开社交媒体了，外国人玩Facebook和Instagram，中国人玩微信和微博。但是在丰富日常生活的同时，社交媒体也威胁着人们的信息安全。有哪些信息是你不能在社交媒体上透露的？一起来看看。

1. Birthday

??

Your birthday is one part of an important puzzle which also includes your name and address, with which people can more easily access your bank account and personal details.

??

2. Phone number

???

The best case scenario here is acquiring a polite admirer. Worst case scenario? A stalker who calls you

incessantly.

??

3. Most of your "friends"

???“??”

Oxford psychology professor Robin Dunbar theorised that humans can maintain approximately 150 stable relationships.

????????????????????????????150????????

After looking at 3,375 Facebook users, Dunbar found that of their Facebook friends, 4.1 were considered dependable, and 13.6 exhibited sympathy during an “emotional crisis.”

????3375?Facebook????????????Facebook????4.1????????13.6????“????”????????

Getting rid of the deadwood can make for a healthier interaction with social media.

????????????????????

4. Photographs of your child/young family member

????????????

Victoria Nash, acting director of the Oxford Internet Institute, posed a really good question on this subject, and it's to do with consent:

????????????????????????????????????

What type of information would children want to see about themselves online at a later date?

????????????????????

Previous generations never needed to consider this, but the advent of the internet and social media has given this question more importance.

????????????????????????????????????

5. While we're at it, where your child/young family member goes to school

????????????????

According to the NSPCC the number of recorded sexual offences has increased over the last year.

????????????????????????????????

The report says:

????

Police recorded 36,429 sexual offences against children in the UK in 2013/2014... in England, Wales, Scotland and Northern Ireland police recorded the highest number of sexual offences against children in the past decade.

2013?2014????????????????36429?.....????????????????????????????????

The last thing you want is to give an opportunity for a sex offender to find out where your child attends school.

????????????????????????????

6. Location services

????

Location services is only available on Android or iPhones.

????????????????

In 2015 TechCrunch reported that over 500 million users accessed Facebook solely from their mobile, which means that the same number has the potential to broadcast their location online, and anyone who may or may not wish you harm now knows where you are.

7. Your manager

????

This one is a classic. Facebook is a social media platform, and to some degree your interactions ought to be relaxed.

????????????Facebook????????????????????????????????

But the CEO of your company can access your wall, he/she has access to every single one of your dodgy status updates - and yes that includes the one moaning about work.

????????????????????????????/????????????????????????????????

Yes you can set your preferences to exclude your CEO from certain update, but isn't that more hassle?

??

8. Stop tagging your location

??????????

People forget the fact that tagging your location at home actually gives away your address.

????????????????????????????????????

9. When and where you're going for holiday

??????????

According to financial website This is Money, travelers who are burgled while they are on holiday may not get their insurance claim accepted if they posted their holiday plans on their social media accounts.

??????This is Money????????????????????????????????????

10. Your relationship status

??????
