Report says air pollution is having a devastating impact on children worldwide, storing up a public health time bomb

??

Poisonous air is having a devastating impact on billions of children around the world, damaging their intelligence and leading to hundreds of thousands of deaths, according to a report from the World Health Organization.

??

The study found that more than 90% of the world's young people – 1.8 billion children – are breathing toxic air, storing up a public health time bomb for the next generation.

??????????90%????-18???-????????????????????????????????????

The WHO said medical experts in almost every field of children's health are uncovering new evidence of the scale of the crisis in both rich and poor countries – from low birth weight to poor neurodevelopment, asthma to heart disease.

??

Dr Tedros Adhanom, WHO director general, said: "Polluted air is poisoning millions of children and ruining their lives. This is inexcusable – every child should be able to breathe clean air so they can grow and fulfil their potential."

"?????????????????????????????????????"
