"I have informed Spark that a significant network security risk was identified," said Andrew Hampton, the director

general of GCSB.

“?????Spark????????????????????”GCSB?????·??? (Andrew Hampton)???

Under the country's telecommunications security law, that means Spark can't use Huawei equipment to build its planned 5G network.

????????????????Spark????????????????5G???

Huawei is China's biggest telecommunications and smartphone company. It has invested heavily in 5G technology, becoming one of the few companies, like Sweden's Ericsson (ERIC) and Finland-based Nokia (NOK), capable of making competitive equipment for global 5G networks.

Huawei said Wednesday that it is "looking into the situation" in New Zealand.

????????????????????

"We will actively address any concerns and work together [with the government] to find a way forward," the company said in a statement.

?????????????:"????????????????(???)????????"

New Zealand's move comes just months after Australia blocked Huawei from providing 5G technology for the country's wireless networks. The United Kingdom has also warned of potential security risks from using Huawei products.
