

《辟谣：特斯拉并没有推出悬浮滑板》

This ‘ Tesla hoverboard ’ is what dreams are made of—but it ’ s just that.

??“?????????”????????????????

If you see people on the internet freaking out over a Tesla hoverboard today, we hate to break it to you, but it's fake.

??

A video of Tesla's alleged newest product was posted to YouTube, and it seems to have generated quite the buzz on social media.

????????????????????YouTube????????????????????

Alas, the hoverboard in the video is completely computer-generated.

????????????????????

But then again, maybe Elon Musk will see it and decide to try to give making one a go.

????????????????????????????????

It's no crazier than his flamethrowers, after all.

????????????????????

Last February, Elon Musk sold \$10 million worth of flamethrowers in four days.

????????????????????1000????????????

Musk announced that all 20,000 of the Boring Company-branded flamethrowers have sold out.

????Boring Company????20,000????????????

Given that they were \$500 each, that means Musk moved \$10 million worth in the four days since they went on sale.

????500????????????????4????????1000????

Musk also announced that every flamethrower will ship with a "complimentary Boring fire extinguisher."

????????????????"???Boring???"?

Still, not everyone is happy about the flamethrower success. Though flamethrowers are legal in America if their flames don't extend more than 10 feet, a Californian politician has said he will seek a ban on the Boring Company selling the flamethrowers in his state.
