

《家电有了“寿命”标准，冰箱、空调的安全使用年限为10年》

1月10日，由中国家用电器协会组织行业制定的“家用电器安全使用年限”系列标准发布。

????????????????????(?????????)

China unveiled its first set of standard life spans for home appliances on Friday to fend off safety risks and promote energy consciousness.

1?10??

????????????????????????(standard life span)????????(standard operating conditions)????????(alert notification)????????

?????(refrigerators)&????(wine cabinets)?????(air conditioners)????????10????????(washing machines)&??? (dryers)?????(range hoods)?????(gas cookers)????????8??

The standard life span of air conditioners starts from date of production, and that of other home appliances from date of sale.

????????????????????

??????????????

??“????”????????????????

The use of electrical home appliances past life expectancy will increase energy consumption and safety risks.

????????????????????

An expected 160 million units of electrical home appliances will expire in 2020.

????2020????1.6????

????????????????

The move will help raise consumers' awareness for safety and energy conservation, and put more new models on the market as well.
