《新闻热词:学术评价体系 academic evaluation system》

教育部、科技部日前印发关于规范高等学校SCI论文相关指标使用的意见，旨在改变目前过度依赖论文发表的学术评价体系。

The Ministry of Education (MOE) and the Ministry of Science and Technology have released a guideline regulating the use of papers listed on the Science Citation Index (SCI) in institutions of higher education in a move to change the current academic evaluation system that is over-reliant on published papers.

It is necessary to reform talent evaluation methods, and to establish and improve evaluation systems for scientific and technological talents that are oriented toward innovation capability, quality, and contribution in order to form and implement evaluation systems that are conducive to scientific research and innovation. We must perfect the reward system so that outstanding talents can enjoy reasonable rewards and all kinds of innovative vitality is inspired.
