

据中国政府网和国家卫生健康委联合提供的“疫情风险等级查询”小程序信息显示，截至4月19日18时，北京市朝阳区为高风险地区，成为全国唯一高风险地区。

As of 6 pm Sunday, Chaoyang district in Beijing had a red alert indicating the highest risk classification on the health-tracking app. Other Chinese cities — including Wuhan, the hardest hit city in China during the COVID-19 outbreak; the northeastern cities of Harbin and Suifenhe; and the southern city of Guangzhou — are all marked as low- or middle-risk areas.

[illegible]

Cities, counties and districts with no newly confirmed cases in the last 14 days are categorized as low-risk regions, those with fewer than 50 cases or those with over 50 but without a concentrated outbreak are classified as medium-risk regions, and those with over 50 cases as well as a concentrated outbreak are classified as high-risk regions.
