Lu Zuxun, a public health professor at Huazhong University of Science and Technology, said from May 14 to June 1, the city conducted nucleic acid tests on 9,899,828 residents and reported 300 asymptomatic cases who show no clear symptoms despite carrying the virus. No confirmed COVID-19 cases were found in the process, and all the 1,174 people in close contact have tested negative for the infection, according to Lu.
