

## 《调查：四分之三成年人愿意接种新冠疫苗 中国人最积极》

如果新冠疫苗研制出来，你愿意接种吗？根据调查，中国人接种疫苗的积极性是最高的，而俄罗斯人的接种意愿是最低的。全球共有四分之一的人不愿意接种疫苗，世界经济论坛的专家表示，这足以抵消其他人接种疫苗的效果。

2020?3?16????????????????????????????????????????(???????????)

Around 74% of adults globally are willing to get immunized against the coronavirus if a vaccine became available — but that may not be enough to defeat the fast-spreading virus, according to a survey released Tuesday.

9?1????????????????????????????????????????74%????????????????????????????????????????

The survey by World Economic Forum and market research firm Ipsos polled close to 20,000 adults across 27 countries over two weeks — between July 24 and Aug 7 this year.

?????(?41%)????????????

China was the most optimistic about the availability of a vaccine in 2020, while respondents from Poland and Japan showed the most skepticism;

??2020????????????????????????????????????????

only 34% of Americans expect a coronavirus vaccine to be ready this year.

??34%??????????????????

Measures to contain the virus, such as border closures and restrictions on movements, have caused a slump in global economic activity. Many governments and people now pin their hopes on a vaccine to help restore some normalcy in the world, but the World Health Organization has warned that a vaccine alone may not end the pandemic.

????????????????????????????????????????????????????????????????????????????????????????

There are at least 30 potential vaccines currently in clinical trials, according to the WHO.
