

## 《迪拜“火炬塔”突发大火》

A massive fire has engulfed one of the world's tallest residential buildings, The Marina Torch, in Dubai on Thursday night.

The local government said on Twitter the building has been evacuated and firefighting squads from four Civil Defense stations have been deployed to battle the raging blaze.

There have been no reports of casualties so far.

This is the second time the 79-storey skyscraper has caught fire. In 2015, the building was damaged by a massive fire that injured 14 people.
