

3?The resistivity and flexivity of the resistance thermostat metal change while the anneal process change.

????????,????????????????????????????????.

4?Long working life and small deforming can be realized by improving anneal process and quenching process.

????????????????,????????????????.

5?Firstly, equiaxed microstructure could be produced by treatments including hot compression and duplex anneal.

????????????????????????????????.

6?Temperatures of anneal: At 30?, the stripes of amplification were most distinctive.

????: ?30????????????.

7?Three: they are hardening, temper and anneal.

????: ????? ? ?????.

8?This paper direct independent reinforcement of column against, explore anneal reinforcing bar spiral hoops strengthen technology.

????????????????,????????????????.

9?Steel welding construction through vibration ageing or anneal with sufficient strength and rigidity and high accuracy.

????????,????????????,????????,????????????.

10?Mathematical model is calculated linear approximation method, general compound shape method and blend genetic anneal method.

???????? ? ?????????????????????????????????.
